

About Me

I'm Creative Director and Studious Engineer from Nantou, Taiwan, working in IT apartment. I am experienced Python developer, also familiar with linux shell script and JS, enjoy turning trifling process into simple, reliable Code.

Besides knowledge of coding, I also use pipline to make the exhausting build and deployment process become more efficient. On top of that, I also a good coordinator in team work, too. Understand the position of Devops, and my aim is to bring Accurate, Automation, Safety to the sever side.

What I do!

 **Pipline**

Experience in github action. Make changes to code that are then automatically tested and pushed out for delivery and deployment.

 **App Development**

Use React to structure front-end of my website, and Fastapi to develop my backend server. Build my api documentation and blog based on [docusaurus](#). [Check my Blog.](#)

 **Monitor**

Experienced in monitor Software, such us Zabbix, Grafana, Elk.

 **CDN**

Experienced in setting of Cloudflare, Aws Cloudfront. Use ssl for saas and rate limit rules to strengthen WebSite Information security.

 **Cloud System**

Experienced in aws and gcp.

 **HTTP Server**

Be familiar with setting of nginx, get used to check the official website of Nginx and stackoverflow to get the answer, always conform to the request, well done!
